STATE MENTAL HOSPITAL PATIENTS: 1966

The number of State mental hospital patients continued its upward trend. As of June 30, 1966, there were 54,276 patients -- 462 per 100,000 population. However, the number of patients in residence has steadily fallen since 1955 when 83% of patients were in the hospital and only 17% on leave. In 1966, with 35,028 patients in residence and 19,248 on leave, the proportions were 65% and 35%, respectively. (See Table 1.)

Approximately 45% of the patients on the books were male, 55% female. Women constituted 60% of the patients on leave, but only 52% of the patients in the hospital. Disregarding Farview -- a hospital for the criminally insane -- the State mental hospitals with the largest proportions of their patients in residence were Wernersville (74.6%) and Woodville (73.8%). Eastern Pennsylvania Psychiatric Institute and Haverford had the largest proportions on leave -- 69.7% and 68.5%, respectively. (See Table 2.)

Schizophrenic reactions continued to be the prevalent mental disorder of patients residing in State mental hospitals, over 53% having this diagnosis. Other significant disorders among the hospital population were mental retardation (9.4%), cerebral arteriosclerosis (8.8%), and manic depressive reactions (4.5%). (See Table 3.)

Patients with schizophrenic reactions also accounted for the largest proportions of total admissions -- 35.7%, direct discharges -- 26.5%, and returns from and placements on leave -- 66.7% and 62.6%, respectively. Of those patients dying in the hospital, 52.4% were diagnosed as having diseases of the senium. (See Table 4.)

Patients over 65 years of age constituted 31.2% of the resident population at the end of the fiscal year. They accounted for over one-fourth of the first admissions and nearly three-fourths of the deaths in the hospital. Patients in the age group 35-44 were most active in the movement categories. During the year, 26.1% of the returns from leave and 25.2% of the placements on leave were patients between the ages 35 and 44 although at the end of the year this age group composed only 14.1% of the resident population. This age group also had the largest proportions of admissions (19.8%) and discharges (25.6%). (See Table 5.)

The counties having the largest numbers of patients residing in State mental hospitals were Philadelphia (8,533) and Allegheny (5,495). Forest with 21 and Cameron with 23 had the smallest numbers. More meaningful, however, is the number of patients per 100,000 population. Forest and Northumberland led with 469 and 439, respectively. Lowest were Bucks with 130 and Adams and Cumberland, each with 144. (See Table 6.)

Most patients were on the books of the State hospitals nearest their home

counties, with the exception of Farview which, because of its specialized nature, draws patients from throughout the State. (See Table 13.)

Tables 7-12 are detailed breakdowns of selected movement categories by age group and mental disorder. They are presented as basic information for reference purposes.

TABLE 1

PATIENTS RESIDING IN STATE AND COUNTY MENTAL HOSPITALS OR ON LEAVE OF ABSENCE, AS OF END OF FISCAL YEAR

1922 - 1966

Year[1]	Patients of State and County Mental Hospitals		Patients of State Mental Hospitals			Patients of County Mental Hospitals

1966	54,276	462	54,276	35,028	19,248	-	-	-

1/ State fiscal year ending date changed from May 31 to June 30 beginning in 1962.
2/ Based on straight-line growth of population between decennial figures reported by the U. S. Census Bureau. The population of Pennsylvania as of April 1, 1960 was 11,319,366.
3/ Includes a few patients absent from hospital but not on formal placement.
4/ Ransom, a county mental hospital, opened in 1924.
5/ Philadelphia Mental Hospital became a State institution in October 1938.
6/ During the fiscal year, the county mental hospitals of Embreeville, Hollidaysburg, Mayview, Somerset, and Woodville became State institutions; those in Lancaster, Mercer, and Schuylkill Counties were closed.
7/ Patients of Western State Psychiatric Institute, opened in late 1942, are included.
8/ During the fiscal year, the county mental hospitals at Clarks Summit and Retreat became State Institutions; the one at Blakely was closed.
9/ Dixmont Mental Hospital became a State-owned institution in October 1945.
10/ During the fiscal year Ransom Hospital was destroyed by fire and was not rebuilt.
11/ Patients of Western State Psychiatric Institute excluded; hospital completely taken over by the University of Pittsburgh.
12/ Patients of Eastern Pennsylvania Psychiatric Institute, first admitted in July 1956, are included.
13/ Patients of Haverford State Hospital, first admitted in October 1962, are included.
14/ Patients of Eastern State School and Hospital, first admitted in July 1963, are included.

June 7, 1968

Office of Mental Health

Prepared by: Office of Planning and Research

STATE MENTAL HOSPITAL PATIENTS: 1967

The upward trend in number of State mental hospital patients over the years was reversed during the last fiscal year and dropped to 52,771 on June 30, 1967. The 33,207 patients residing in the hospitals represented a decrease of 1,864 patients from the end of the previous year. There were 19,564 patients on leave of absence. (See Table 1.)

In total, women continued to outnumber men (by 10%) as patients of State mental hospitals on June 30, 1967. While there were 22% more females than males on leave of absence, there were only 4% more females than males in residence. (See Table 2.)

Psychotic discrders were the most prevalent of the mental disorders among the patients in residence at the end of the year. Although there was a decrease of 1,864 patients from the end of the previous year, the percentage distribution by mental disorder remained almost constant. (See Table 3.)

Patients with schizophrenic reactions accounted for 54% of the residents and 36% of admissions. However, these patients represented 66% of the returns from leave, 62% of placements, and 23% of deaths in the hospitals. While patients with a mental disorder related to alcoholism represented only a small part of the residents (4%), they accounted for 12% of admissions and 24% of direct discharges. Approximately 91% of residents with diseases of the senium were aged 65 and over. Patients with this disorder represented about 11% of all residents. Admissions of this type of patient accounted for 15% and deaths, 48%. These percentages have varied little over the last few years. (See Table 4.)

Just as the percentage distribution of patients by mental disorder has not changed, so also has the distribution by age group not changed over the last year. While patients under 45 years of age represented only 26% of the residents, they accounted for more than half of admissions, placements, returns, and direct discharges. Patients over 65 years of age continued to account for about one-fourth of the first admissions and nearly three-fourths of the deaths in the hospitals. (See Table 5.)

With the decrease in number of resident patients, the number per 100,000 population decreased from 298 on June 30, 1966 to 285 on June 30, 1967. The counties having the largest numbers of patients residing in State mental hospitals continued to be Philadelphia (7,720) and Allegheny (5,339). The number of mentally ill residents in State mental hospitals per 100,000 population by county of residence ranged from a low of 138 to a high of 436. (See Table 6.)

Most patients were on the books of the State hospital nearest their home counties, with the exception of Farview, which, because of its specialized nature, draws patients from throughout the State. (See Table 13.)

Tables 7 - 12 are detailed breakdowns of selected movement categories by age group and mental disorder. They are presented as basic information for reference purposes.

1/ State fiscal year ending date changed from May 31 to June 30 beginning in 1962.
2/ Includes a few patients absent from hospital but not on formal placement.
3/ Ransom, a county mental hospital, opened in 1924.
4/ Philadelphia Mental Hospital became a State institution in October 1938.
5/ During the fiscal year, the county mental hospitals of Embreeville, Hollidaysburg, Mayview, Somerset, and Woodville became State institutions; those in Lancaster, Mercer, and Schuylkill Counties were closed.
6/ Patients of Western State Psychiatric Institute, opened in late 1942, are included.
7/ During the fiscal year, the county mental hospitals at Clarks Summit and Retreat became State Institutions; the one at Blakely was closed.
8/ Dixmont Mental Hospital became a State-owned institution in October 1945.
9/ During the fiscal year Ransom Hospital was destroyed by fire and was not rebuilt.
10/ Patients of Western State Psychiatric Institute excluded; hospital completely taken over by the University of Pittsburgh.
11/ Patients of Eastern Pennsylvania Psychiatric Institute, first admitted in July 1956, are included.
12/ Patients of Haverford State Hospital, first admitted in October 1962, are included.
13/ Patients of Eastern State School and Hospital, first admitted in July 1963, are included.
14/ Patients of emotionally disturbed unit of Western State School, first admitted in April 1965, are included.

STATE MENTAL HOSPITAL PATIENTS: 1968

A reverse in the upward trend since 1922 in the rising number of State mental hospital patients occurred on June 30, 1967, and continued downward on June 30, 1968. From a peak of 54,319 patients on the books of the State mental hospitals on the last day of June 1966, the number of patients dropped to 52,771 on June 30, 1967, and to 50,779 at the end of June 1968.

Of the 50,779 State mental hospital patients on June 30, 1968, a total of 30,793 were in residence and 19,986 were on leave of absence. Compared to June 30, 1967, resident patients had decreased by 2,414 but there were 422 more on leave. (Table 1)

Women patients continued to outnumber men by 24% in total on June 30, 1968. On this date, there were 8% more females than males residing in hospitals and 55% more on leave of absence. (Table 2)

Psychotic disorders (predominately schizophrenic reactions) were the mental disorder of 63% of the patients residing in the hospitals on June 30, 1968. Fifty-five per cent of the male patients and a similar proportion of the women residents were afflicted with schizophrenic reactions. (Table 3)

On the last day of the fiscal year the percentage distribution of the mental disorders of the resident population was almost identical to those on the first day of the year. Schizophrenic reactions was the diagnosis of 55% of the resident patients at the end of the year, 1% more than at the beginning of the year. The schizophrenic patients accounted for much of the movement during the year, 26% of the first admissions, 47% of the readmissions, 62% to 65% of the placements on and returns from leave, and 62% to 63% of the transfers in and out of the hospitals. Ten per cent of the first admissions were alcoholics. Forty-nine per cent of the year's deaths in the hospital involved patients with diseases of the senium. (Table 4)

The percentage distribution of resident patients by age group was about the same on the first and last day of the fiscal year. On both days 74% of the patients were 45 years of age or older. However, patients under 45 years of age represented more than half of the admissions, placements, returns, and direct discharges during the year. Patients 65 years of age or over continued to account for nearly three-fourths of the deaths in the hospitals. (Table 5)

For the State as a whole, there were 264 resident patients in the State mental hospitals per 100,000 population in the Commonwealth on June 30, 1968. This was 21 patients per 100,000 population fewer than on the last day of the preceding year. The number of mentally ill residents per 100,000 population by county of

PENNSYLVANIA STATE LIBRARY
DOCUMENTS SECTION
SEP 2 1969

residence ranged from 119 in Bucks and Centre counties to 406 in Lackawanna County. The counties having the largest number of patients residing in State mental hospitals continued to be Philadelphia (6,481) and Allegheny (5,167). (Table 6)

Most patients were on the books of the State hospital nearest their home counties, with the exception of Farview, which, because of its specialized nature, draws patients from throughout the State. (Table 13)

Presented as basic information for reference purposes, Tables 7-12 provide detailed information on selected movement categories by age group and mental disorder.

1/ State fiscal year ending date changed from May 31 to June 30 beginning in 1962.
2/ Includes a few patients absent from hospital but not on formal placement.
3/ Ransom, a county mental hospital, opened in 1924.
4/ Philadelphia Mental Hospital became a State institution in October 1938.
5/ During the fiscal year, the county mental hospitals of Embreeville, Hollidaysburg, Mayview, Somerset, and Woodville became State institutions; those in Lancaster, Mercer, and Schuylkill Counties were closed.
6/ Patients of Western State Psychiatric Institute, opened in late 1942, are included.
7/ During the fiscal year, the county mental hospitals at Clarks Summit and Retreat became State Institutions; the one at Blakely was closed.
8/ Dixmont Mental Hospital became a State-owned institution in October 1945.
9/ During the fiscal year Ransom Hospital was destroyed by fire and was not rebuilt.
10/ Patients of Western State Psychiatric Institute excluded; hospital completely taken over by the University of Pittsburgh.
11/ Patients of Eastern Pennsylvania Psychiatric Institute, first admitted in July 1956, are included.
12/ Patients of Haverford State Hospital, first admitted in October 1962, are included.
13/ Patients of Eastern State School and Hospital, first admitted in July 1963, are included.
14/ Patients of emotionally disturbed unit of Western State School, first admitted in April 1965, are included.

OMH-1.11 January 29, 1971

COMMONWEALTH OF PENNSYLVANIA
DEPARTMENT OF PUBLIC WELFARE
Mrs. Helene Wohlgemuth, Secretary

Office of Mental Health

Prepared by: Office of Planning and Research

STATE MENTAL HOSPITAL PATIENTS: 1969

Continuing the downward trend in the number of State mental hospital patients since 1966, 45,905 patients were listed on the books as of June 30, 1969. This represented a decrease of 8,414 from the peak of 54,319 patients on the books on June 30, 1966, which marked the end of the rising trend in enrollment since 1922.

Of the 45,905 State mental hospital patients on the books on June 30, 1969, 27,536 were in residence and 18,369 were on leave of absence. Compared to June 30, 1968, there were 3,257 fewer patients in residence and 1,617 fewer on leave, for a total decrease of 4,874 patients on the books. (Table 1)

Female patients continued to outnumber males in fiscal 1969. At the end of the fiscal year they accounted for 52% of the residents, 60% of the patients on leave, and 55% of all patients on the books. (Table 2)

Psychotic disorders (predominantly schizophrenic reactions) were the mental disorders of 63% of all residents at the end of fiscal 1969. Fifty-six percent of both male and female patients were afflicted with schizophrenic reactions. These figures were almost identical to those of 1968. (Table 3)

At the end of the fiscal year, the percentage distribution of the prevailing mental disorders of the resident population was identical to that at the beginning of the year. Schizophrenic reactions were the most common disorders, associated with 55% of all residents. The schizophrenic patients continued to account for much of the movement during the year, comprising 38% of all admissions, 60% of placements on and 67% of returns from leave, and 54% of transfers in and 58% of transfers out among the mental hospitals and institutions for the mentally retarded in the State system. Thirteen percent of all admissions were alcoholics. Thirty-three percent of the year's deaths in the hospitals involved patients with diseases of the senium. (Table 4)

The percentage distribution of resident patients by age group was exactly the same on the last as on the first day of the fiscal year, with patients 45 years of age and older accounting for 74% of the resident population. However, patients under 45 years of age accounted for more than half of the year's movement of residents except deaths in the hospitals. Patients 65 years of age and older accounted for 69% of deaths in the hospitals, down from 74% last year. (Table 5)

The time on the books of the hospitals since last admission was under 3 years for 22% of the June 30, 1969 residents; 3 to 10 years for 22%; 10 to 20 years for 20%; and 20 years or more for 36%. By age groups, the largest percentage of both male and female residents 25 to 34 years of age had been on the books for 5 to 10 years; the 35 to 44 age group for 10 to 20 years; each group 45 years or over for 20 years or over. The largest percentage of males under 25 years of age had been residents for 1 to 3 years, while the largest portion of females under 25 had resided in the hospitals less than 3 months. (Table 7)

For the State as a whole, there were 233 residents in the State mental hospitals per 100,000 population as of June 30, 1969. The number of residents per 100,000 population by county of residence ranged from 98 from Bucks County to 396 from Sullivan County. The counties having the largest number of patients residing in State mental hospitals continued to be Philadelphia (5,324) and Allegheny (4,838). (Table 9)

During the fiscal year, there were 74 admissions to the State mental hospitals per 100,000 of the Commonwealth's population. The number of admissions per 100,000 of population by county of residence ranged from no admissions from Sullivan County to 166 from Warren County. Philadelphia and Allegheny Counties had the largest number of admissions, with 1,218 and 1,061, respectively. (Table 11)

Of the 8,713 admissions in fiscal 1969, 5,750 were admitted by medical certification (66%), 1,195 were voluntary commitments (14%), 1,061 were court commitments (12%), 668 were emergency commitments (8%), and 35 were correctional transfers (less than 1%). Medical certification was the most predominant type of commitment to all hospitals except to Farview (court), Haverford (emergency), and Somerset (voluntary). (Table 12)

Most June 30, 1969 patients were on the books of the State hospitals nearest their home counties, with the exception of Farview, which, because of its specialized nature, drew patients from throughout the State. (Table 16)

1/ State fiscal year ending date changed from May 31 to June 30 beginning in 1962.
2/ Includes a few patients absent from hospital but not on formal placement.
3/ Ransom, a county mental hospital, opened in 1924.
4/ Philadelphia Mental Hospital became a State institution in October 1938.
5/ During the fiscal year, the county mental hospitals of Embreeville, Hollidaysburg, Mayview, Somerset and Woodville became State institutions; those in Lancaster, Mercer and Schuylkill Counties were closed.
6/ Patients of Western State Psychiatric Institute, opened in late 1942, are included.
7/ During the fiscal year, the county mental hospitals at Clarks Summit and Retreat became State institutions; the one at Blakely was closed.
8/ Dixmont Mental Hospital became a State-owned institution in October 1945.
9/ During the fiscal year Ransom Hospital was destroyed by fire and was not rebuilt.
10/ Patients of Western State Psychiatric Institute excluded, hospital completely taken over by the University of Pittsburgh.
11/ Patients of Eastern Pennsylvania Psychiatric Institute, first admitted in July 1956, are included.
12/ Patients of Haverford State Hospital, first admitted in October 1962, are included.
13/ Patients of Eastern State School and Hospital, first admitted in July 1963, are included.
14/ Patients of emotionally disturbed unit of Western State School, first admitted in April 1965, are included.

Inter-Program Planning
and Evaluation

Office of Mental Health

STATE MENTAL HOSPITAL PATIENTS: 1970

Continuing the downward trend in the number of State mental hospital patients since 1966, 36,743 patients were listed on the books as of June 30, 1970. This represents a decrease of 17,576 from the peak of 54,319 patients on the books on June 30, 1966, which marked the end of the rising trend in enrollment since 1922.

Of the 36,743 State mental hospital patients on the books on June 30, 1970, 24,799 were in residence and 11,944 were on leave of absence. Compared to June 30, 1969, there were 2,737 fewer patients in residence and 6,425 fewer on leave, for a total decrease of 9,162 patients on the books. (Table 1)

Female patients continued to outnumber males. At the end of the fiscal year they accounted for 52% of the residents, 56% of the patients on leave, and 53% of all patients on the books. (Table 2)

Psychotic disorders (predominantly schizophrenic reactions) continued to be the predominant diagnoses of resident patients, with 62% of the June 30, 1970 residents suffering from such disorders. As in recent years, the majority (55%) of resident patients were afflicted with schizophrenic reactions. (Table 3)

At the end of the fiscal year, the prevailing mental disorders of the resident population were similar to those at the beginning of the year, with the exception of a drop from 4% to 2% in the category of all other psychotic disorders, and a slight rise (from 4% to 5%) in patients suffering from manic depressive reactions. The schizophrenic patients continued to account for much of the movement during the year, comprising 40% of all admissions, 62% of placements on 66% of returns from leave, 57% of transfers in and 70% of transfers out among the mental hospitals and institutions for the mentally retarded in the State system. The percentage of alcoholics admitted during the fiscal year (13%) was identical to that of fiscal 1968-1969. Diseases of the senium continued to be the predominant cause of deaths in hospitals, being the cause of death in 40% of the cases, as compared with 33% last year.

The percentage distribution of resident patients by age group varied only slightly from the first to the last day of the fiscal year. As in the last two years, patients 45 years of age and older accounted for 74% of the resident population at the end of the year. On the other hand, patients under 45 years of age accounted for half or more of the year's movement of residents except for placements on leave and deaths in the hospitals. Identical to last year, 69% of the deaths in the hospitals were patients 65 years of age or older. (Table 5)

The dominant mental disorders of resident patients in all age groups were psychotic disorders (predominantly schizophrenic reactions). Other frequent diagnoses were personality disorders for those patients under 25 years of age, and organic brain syndromes for patients 65 years of age and older. (Table 6)

The time on the books of the hospitals since last admission was under 3 years for 22% of the June 30, 1970 residents; 3 to 10 years for 21%; 10 to 20 years for 20%; and 20 years or more for 37%. By age groups, the largest percentage of both male and female residents under 25 years of age had been on the books for 1 to 3 years; the 25 to 34 age group for 5 to 10 years; the 35 to 44 age group for 10 to 20 years; and each group 45 years of age and over for 20 years or longer. (Table 7)

For the State as a whole, there were 312 patients residing in or on leave of absence from State mental hospitals per 100,000 population as of June 30, 1970. The number of patients residing or on leave per 100,000 population by county of residence ranged from 131 from Bucks County to 449 from Lackawanna County. The counties having the largest number of patients residing in or on leave from State mental hospitals continued to be Philadelphia (7,984) and Allegheny (5,569). (Table 9)

During fiscal 1969-70, there were 71 admissions to the State mental hospitals per 100,000 of the Commonwealth's population. The number of admissions per 100,000 of population by county of residence ranged from no admissions from Fulton County to 152 from Delaware County. Philadelphia and Allegheny Counties had the largest number of admissions, with 1,066 and 936, respectively. (Table 11)

Of the 8,415 admissions in fiscal 1969-70, 3,974 were admitted by medical certification (47%), 2,134 were voluntary commitments (25%), 1,725 were court commitments (21%), 519 were emergency commitments (6%), and 63 were correctional transfers (1%). Medical certification was the predominant type of commitment to all hospitals except Farview (court), and Haverford, Norristown, Somerset, and EPPI (voluntary). (Table 12)

Most resident patients as of June 30, 1970, were on the books of the State hospital nearest their home counties, with the exception of Farview, which, because of its specialized nature, drew patients from throughout the State. (Table 16)

1/ State fiscal year ending date changed from May 31 to June 30 beginning in 1962.
2/ Includes a few patients absent from hospital but not on formal placement.
3/ Ransom, a county mental hospital, opened in 1924.
4/ Philadelphia Mental Hospital became a State institution in October 1938.
5/ During the fiscal year, the county mental hospitals of Embreeville, Hollidaysburg, Mayview, Somerset, and Woodville became State institutions; those in Lancaster, Mercer, and Schuylkill Counties were closed.
6/ Patients of Western State Psychiatric Institute, opened in late 1942, are included.
7/ During the fiscal year, the county mental hospitals at Clarks Summit and Retreat became State institutions; the one at Blakely was closed.
8/ Dixmont Mental Hospital became a State-owned institution in October 1945.
9/ During the fiscal year Ransom Hospital was destroyed by fire and was not rebuilt.
10/ Patients of Western State Psychiatric Institute excluded, hospital completely taken over by the University of Pittsburgh.
11/ Patients of Eastern Pennsylvania Psychiatric Institute, first admitted in July 1956, are included.
12/ Patients of Haverford State Hospital, first admitted in October 1962, are included.
13/ Patients of Eastern State School and Hospital, first admitted in July 1963, are included.
14/ Patients of emotionally disturbed unit of Western State School, first admitted in April 1965, are included.

COMMONWEALTH OF PENNSYLVANIA
DEPARTMENT OF PUBLIC WELFARE
Mrs. Helene Wohlgemuth, Secretary

Office of Mental Health

Prepared by: Office of
Inter-Program Planning
and Evaluation

STATE MENTAL HOSPITALS: 1971

The downward trend in the number of State mental hospital patients continued during the year as 30,674 patients were listed on the books on June 30, 1971. These 30,674 patients represent a decrease of 23,645 from the peak of 54,319 in 1966, and is the smallest number on the books since 1932. (Table 1)

Of the 30,674 patients on the books on June 30, 1971, 22,200 were in residence and 8,474 were on leave of absence. Compared to June 30, 1970, there were 2,599 fewer patients in residence and 3,470 fewer on leave, for a total decrease of 6,069 patients on the books.

Female patients again outnumbered males. At the end of the fiscal year they accounted for 52% of the resident patients, 55% of those on leave, and 53% of all patients on the books. (Table 2)

Psychotic disorders (predominantly schizophrenic reactions) continued to be the prevailing diagnoses of resident patients, with 62% of the year-end residents suffering from such disorders. As in recent years, the majority (55%) of resident patients were afflicted with schizophrenic reactions. These figures are identical to those of fiscal 1970. (Table 3)

At the end of the fiscal year, the prevailing mental disorders of the resident population were similar to those at the beginning of the year, with schizophrenic reactions remaining the same at 55%, and diseases of the senium decreasing slightly from 10% to 9%. Patients suffering from manic depressive reactions dropped from 5% to 3%, while those suffering from other psychotic disorders increased from 2% to 4%. The schizophrenic patients continued to account for much of the movement during the year, comprising 43% of all admissions, 62% of placements on and 65% of returns from leave, 63% of transfers in and 66% of transfers our among the hospitals and institutions in the State system. The percentage of alcoholics admitted during the fiscal year (13%) was identical to that of the last two years. Diseases of the senium continued to be the predominant causes of death in hospitals, rising to 43%, from 40% last year and 33% in 1969. (Table 4)

The percentage distribution of residents by age groups remained exactly the same from the first to the last day of the fiscal year. As in the last three years, patients 45 years of age and older accounted for 74% of the resident population at the end of the year. On the other hand, patients under 45 years of age continued to account for half or more of the year's movement of residents except for placements on leave and deaths in the hospitals. Identical to the last two years, 69% of the deaths in hospitals were patients 65 years of age or older. (Table 5)

The dominant mental disorders of resident patients in all age groups were psychotic disorders (predominantly schizophrenic reactions). The other most frequent diagnoses were personality disorders for those patients under 25 years of age, and organic brain syndromes for patients 65 years of age and older. These trends are similar to recent years. (Table 6)

The time on books of the hospital since last admission was under 3 years for 24% of the year-end residents, 3 to 10 years for 20%, 10 to 20 years for 19%, and 20 years or more for 38%. By age groups, the largest per cent of both male and female residents under 24 years of age had been on the books for 1 to 3 years, the 25 to 34 age group for 5 to 10 years, the 35 to 44 age group for 10 to 20 years, and each group 45 years of age and older for 20 years or longer. It is interesting to note that over half (57%) of all patients have been on the books for 10 or more years, and that two-thirds of these have been on for 20 years or more. Of this latter group, nearly 75% were 55 years of age or older. (Table 7)

For the state as a whole, there were 260 patients residing in or on leave of absence from State mental hospitals per 100,000 population as of June 30, 1971. The number per 100,000 by county of residence ranged from 111 for Bucks County to 546 for Northumberland County. The counties having the largest number of patients residing in or on leave of absence from State mental hospitals continued to be Philadelphia (5,658) and Allegheny (5,021). (Table 9)

During fiscal 1970-1971, there were 80 admissions to the State mental hospitals per 100,000 of the Commonwealth's population. The number per 100,000 of population by county of residence ranged from 18 for Juniata County to 184 for Delaware County. As was to be expected, Philadelphia and Allegheny Counties had the largest number of admissions, with 1,255 and 1,107 respectively. (Table 11)

Of the 9,437 admissions during the fiscal year, 4,148 were voluntary commitments (44%), 2,709 were court commitments (29%), 1,436 were admitted by medical certification (15%), 1,111 were emergency commitments (12%), and 33 were correctional transfers. Voluntary commitment was the predominant type of commitment in a majority of hospitals. These figures represent a significant change from fiscal 1970, due to the abolition of medical certification by Federal court decision during the fiscal year. (Table 12)

Most resident patients as of June 30, 1971, were on the books of the State hospital nearest their home counties, with the exception of Farview, which, because of its specialized nature, drew patients from throughout the State. (Table 16)

TABLE 1

PATIENTS RESIDING IN STATE AND COUNTY MENTAL HOSPITALS OR ON LEAVE OF ABSENCE, AS OF END OF FISCAL YEAR

1922 - 1971

Year[1]	Patients of State and County Mental Hospitals		Patients of State Mental Hospitals			Patients of County Mental Hospitals

1971	30,674	260	30,674	22,200	8,474	-	-	-

1/ State fiscal year ending data changed from May 31 to June 30 beginning in 1962.

2/ County hospitals became State institutions in Embreeville, Hollidaysburg, Mayview, Somerset, and Woodville in fiscal 1941-1942, and Clarks Summit and Retreat in 1943-1944. Philadelphia and Dixmont mental hospitals became State institutions in 1938 and 1945 respectively. Western State Psychiatric Institute opened in 1942, Eastern State Psychiatric Institute in 1950, Haverford in 1962, Eastern State School and Hospital in 1963, and the emotionally disturbed unit of Western State School and Hospital in 1965. Western State Psychiatric Institute became a private institution in fiscal 1949-1950.

3/ The county mental hospital at Ransom opened in 1924. County mental hospitals were closed in Lancaster, Mercer, and Schuylkill Counties in fiscal 1941-1942, Blakely in 1943-1944, and Ransom in 1946-1947.

4/ Includes a few patients absent from hospital but not on formal placement.
